The May Meeting

The Ann Arbor Orchid Society is extremely lucky to have Dr. Eric Christensen as speaker this month. Eric is a renowned expert on vanda-ceous and Peruvian orchids, orchid taxonomy and culture, and the au-thor of many articles and reviews. He has also authored a book on Pha-laenopsis. Eric will talk on "Phragmipedium and Their Habitats".
Welcome Eric!

President's Message

This will be our last official meeting until September. I'm ready to put my orchids out on the balcony for the summer. I can now turn off of the grow lights and save money for the summer. As for society events for the summer, be on the lookout for our annual picnic which will be in July or August. There will be plants for auction, food, and fun. Look for the picnic information and the member-ship renewal notices within the next month.

It is also election time. The nominat-ing committee has been working hard to get you a slate of officers for the coming years. Thanks Randy Long, Jim Cather, Alex Challis, and Neal Foster for all the work you put into getting this slate.

I hope to see you all at the next meeting.

Kevin

AAOS Display at Laurel Park

Thanks to Randy Long for this picture of our display at Laurel Park. Dottie Winter did a great job of arranging the plants. Thanks everyone for the use of your plants, and for all your help.

Paige's Orchid Loving Visitor

The first week of May we were very honored to have a Pileated Woodpecker visit us for a few days. He showed up on the railing of our back deck and spent many hours pacing back and forth, looking over the house. (That made George very nervous.) He then decided to perch on the window sills. He is a huge bird and it was very startling to turn around near a window and he would be looking in, just a couple feet away. I'm sure that beak could break my windows. Occasionally he'd fly a few feet to the nearest oak tree. Most of the time he didn't do any pecking for bugs, but when he decided to do that, I had to shoo him off the house. On the third day he was spending with us, he found the greenhouse. He would spend most of his day looking in the windows and the sliding glass door. He was a true orchid lover, but preferred those growing on the north and northwest sides; the Scaphosepalums and Masdevalias on the lower shelf. The Bulbophyllums and Cattleyas on the south side didn't interest him. He was a beautiful bird! He would fluff his mohawk and look very stunning. I'm sorry he left after 6 days, but hopefully he's out in the woods with a girlfriend and making orchid-loving babies.
